

## Caring for your tree

- Stand the tree in a container of water for a day before bringing it into the house.
- Saw an inch off the bottom of the tree at a slight angle immediately before mounting it in a stand or placing it in pebbles in a bucket. The tree will absorb more water this way.
- Position the tree away from direct heat and radiators.
- Cut trees are the same as cut flowers – they need fresh water each day. Approximately 1-2 litres daily.
- Always disconnect fairy lights and electrical tree decorations before watering your tree.
- Use a Christmas tree needle spray to minimise needle drop.

## Caring for the environment

Make a responsible and environmentally sound choice this Christmas when you buy a real tree from Dobbies. All Dobbies trees come from sustainable plantations.

Not only that, a real Christmas tree is renewable and recyclable. Two or three saplings replace each harvested tree, providing habitat for wildlife, protecting natural water supplies, cleaning the air, minimising soil erosion and turning carbon dioxide into life-sustaining oxygen. Plus your real tree can be planted in the garden (if it is pot grown) or recycled into mulch or chippings for footpaths.

## Have your Christmas tree delivered to your door.

Transporting a Christmas tree can be challenging for most people, but Dobbies delivery service will give you peace of mind that your chosen tree will be delivered hassle free and in perfect condition to your home or workplace.

We can also deliver larger planted arrangements too. Simply ask in store for full details.

# Choosing and caring for your Dobbies Christmas tree during the festive season.

## Nordman Fir

A beautiful slender tree with lush, dark green, soft and feathery foliage. This variety has excellent needle retention.

Available in sizes up to 300cm-350cm (approx. 10'-11')

## Fraser Fir

This is the most fragrant of our Christmas trees giving off a delightful citrus fragrance. Fraser Fir is a narrow tree and has great needle holding capacity.

Available in sizes up to 225cm-250cm (approx. 9')

## Lodgepole Pine

Pines are grown in the Scottish Highlands. Pines make wonderful Christmas trees with graceful branches and soft, heavily fragrant needles which will hold well throughout the Christmas period.

Available in sizes up to 150cm-210cm (approx. 5'-7')

## Norway Spruce

The traditional Christmas tree loved by many. This is one of the best shaped Christmas trees producing dense green needles. For best results leave as long as possible before bringing in to a warm house and make sure you use a Christmas tree stand that holds water as this tree needs to be kept watered every few days.

Available in sizes up to 300cm-400cm (approx. 10'-13')

## Noble Fir

This is the number one needle holding tree. The robust bluey/green fragrant foliage is popular in America where traditionally Christmas presents are placed on the tree as well as under it.

Available in sizes up to 270cm (approx. 9')

## Pot Grown Trees

These are becoming more and more popular each year. Not only do they make ideal indoor Christmas trees, they bring all year round colour to the garden after the festive season is over. Our range includes Norway Spruce, Blue Spruce, Nordman Fir, Serbian Spruce and Fraser Fir.

At Dobbies you'll also find a great selection of Christmas tree stands, fresh holly, wreaths, mistletoe and colourful seasonal shrubs to brighten up your garden and home this Christmas.
